B.4.4.a Formal models

B.4.4.b Simulation

B.4.4.c Verification

B.4.4.d Worst-case analysis

B.4.5 Reliability, Testing, and Fault-Tolerance

B.4.5.a Built-in tests

B.4.5.b Diagnostics

B.4.5.c Error-checking

B.4.5.d Hardware reliability

B.4.5.e Redundant design

B.4.5.f Test generation

B.4.m Miscellaneous

B.5 Register-Transfer-Level Implementation

B.5.0 General

B.5.1 Design

- B.5.1.a Arithmetic and logic units
- B.5.1.b Control design
- B.5.1.c Data-path design
- B.5.1.d Memory design
- B.5.1.e Styles
- B.5.2 Design Aids
  - B.5.2.a Automatic synthesis
  - B.5.2.b Hardware description languages
  - B.5.2.c Optimization
  - B.5.2.d Simulation
  - B.5.2.e Verification
- B.5.3 Reliability and Testing
  - B.5.3.a Built-in tests
  - B.5.3.b Error-checking
  - B.5.3.c Redundant design
  - B.5.3.d Test generation
  - B.5.3.e Testability
- B.5.m Miscellaneous
- B.6 Logic Design
  - B.6.0 General
  - B.6.1 Design Styles
    - B.6.1.a Cellular arrays and automata
    - B.6.1.b Combinational logic
    - B.6.1.c Logic arrays
    - B.6.1.d Memory control and access
    - B.6.1.e Memory used as logic
    - B.6.1.f Parallel circuits
    - B.6.1.g Sequential circuits
  - B.6.2 Reliability and Testing
    - B.6.2.a Built-in tests
    - B.6.2.b Error-checking
    - B.6.2.c Redundant design
    - B.6.2.d Test generation
    - B.6.2.e Testability
  - B.6.3 Design Aids
    - B.6.3.a Automatic synthesis
    - B.6.3.b Hardware description languages
    - B.6.3.c Optimization
    - B.6.3.d Simulation
    - B.6.3.e Switching theory
    - B.6.3.f Verification
  - B.6.m Miscellaneous

B.7 Integrated Circuits

B.7.0 General

B.7.1 Types and Design Styles

B.7.1.a Advanced technologies

B.7.1.b Algorithms implemented in hardware

B.7.1.c Gate arrays

B.7.1.d Input/output circuits

B.7.1.e Memory technologies

B.7.1.f Microprocessors and microcomputers

B.7.1.g Network connectivity chips

B.7.1.h Standard cells

B.7.1.i VLSI

B.7.2 Design Aids

B.7.2.a Graphics

B.7.2.b Layout

B.7.2.c Placement and routing

B.7.2.d Simulation

B.7.2.e Verification

B.7.3 Reliability and Testing

B.7.3.a Built-in tests

B.7.3.b Error-checking

B.7.3.c Fault injection

B.7.3.d Redundant design

B.7.3.e Test generation

B.7.3.f Testability

B.7.m Miscellaneous

B.8 Performance and Reliability

B.8.0 General

B.8.1 Reliability, Testing, and Fault-Tolerance

B.8.2 Performance Analysis and Design Aids

B.8.m Miscellaneous

B.9 Power Management

B.9.1 Low-power design

B.9.2 Energy-aware systems

B.9.3 Temperature-aware design

B.9.4 Design for power delivery limits

B.9.5 Design for voltage stability

B.m Miscellaneous

B.m.a Design management

C Computer Systems Organization

C.0 General

C.0.a Emerging technologies

- C.0.b Hardware/software interfaces
- C.0.c Instruction set design
- C.0.d Modeling of computer architecture
- C.0.e System architectures, integration and modeling
- C.0.f Systems specification methodology
- C.1 Processor Architectures
- C.1.0 General
  - C.1.1 Single Data Stream Architectures
    - C.1.1.a MISD processors
    - C.1.1.b Pipeline processors
    - C.1.1.c RISC/CISC, VLIW architectures
    - C.1.1.d SISD processors
    - C.1.1.e Von Neumann architectures
  - C.1.2 Multiple Data Stream Architectures (Multiprocessors)
    - C.1.2.a Array and vector processors
    - C.1.2.b Associative processors
    - C.1.2.c Connection machines
    - C.1.2.d Interconnection architectures
    - C.1.2.e Load balancing and task assignment
    - C.1.2.f MIMD processors
    - C.1.2.g Parallel processors
    - C.1.2.h Pipeline processors
    - C.1.2.i TC scheduling and synchronization
    - C.1.2.j SIMD processors
  - C.1.3 Other Architecture Styles
    - C.1.3.a Adaptable architectures
    - C.1.3.b Analog computers
    - C.1.3.c Capability architectures
    - C.1.3.d Cellular architecture
    - C.1.3.e Dataflow architectures
    - C.1.3.f Heterogeneous (hybrid) systems
    - C.1.3.g High-level language architectures
    - C.1.3.h Multithreaded processors
    - C.1.3.i Neural nets
    - C.1.3.j Neurocomputers
    - C.1.3.k Pipeline processors
    - C.1.3.l Stack-oriented processors
  - C.1.4 Parallel Architectures
    - C.1.4.a Distributed architectures
    - C.1.4.b Mobile processors

- C.1.4.c Real-time distributed
- C.1.4.d Scheduling and task partitioning
- C.1.4.e Multi-core/single-chip multiprocessors
- C.1.4.f Speculative multi-threading
- C.1.4.g On-chip interconnection networks

- C.1.5 Micro-architecture implementation considerations

- C.1.5.a Instruction fetch
- C.1.5.b Pipeline implementation
- C.1.5.c Superscalar, dynamically-scheduled, and statically-scheduled implementation
- C.1.5.d Support for multi-threaded execution
- C.1.5.e Memory hierarchy
- C.1.5.f Decoupled organizations
- C.1.5.g Physically aware micro-architecture: power, thermal, impact of technology trends, etc.
- C.1.5.h Support for reliability
- C.1.5.i Support for dynamic compilation
- C.1.5.j Support for security

- C.1.m Miscellaneous
  - C.1.m.a Analog computers
  - C.1.m.b Hybrid systems

- C.2 Communication/Networking and Information Technology

- C.2.0 General
  - C.2.0.a Architecture
  - C.2.0.b Data communications
  - C.2.0.c Emerging technologies
  - C.2.0.d Infrastructure protection
  - C.2.0.e Interprocessor communications
  - C.2.0.f Network-level security and protection
  - C.2.0.g OSI reference model

- C.2.0.h Standards
  - C.2.1 Network Architecture and Design

- C.2.1.a ATM
- C.2.1.b Centralized networks
- C.2.1.c Circuit-switching networks
- C.2.1.d Distributed networks
- C.2.1.e Frame relay networks
- C.2.1.f ISDN
- C.2.1.g Network communications

- C.2.1.h Network topology
- C.2.1.i Packet-switching networks
- C.2.1.j Store and forward networks
- C.2.1.k Wireless communication
- C.2.2 Network Protocols
  - C.2.2.a Applications
  - C.2.2.b Protocol architecture
  - C.2.2.c Protocol verification
  - C.2.2.d Routing protocols
- C.2.3 Network Operations
  - C.2.3.a Network management
  - C.2.3.b Network monitoring
  - C.2.3.c Public networks
- C.2.4 Distributed Systems
  - C.2.4.a Client/server
  - C.2.4.b Distributed applications
  - C.2.4.c Distributed databases
  - C.2.4.d Network operating systems
- C.2.5 Local-Area Networks
  - C.2.5.a Access schemes
  - C.2.5.b Buses
  - C.2.5.c Ethernet
  - C.2.5.d High-speed
  - C.2.5.e Internet
  - C.2.5.f Token rings
- C.2.6 Internetworking
  - C.2.6.a Bridges
  - C.2.6.b Gateways
  - C.2.6.c Multicast
  - C.2.6.d Protocols
  - C.2.6.e Routers
  - C.2.6.f Standards
- C.2.7 Wide-area networks
  - C.2.7.a CATV
  - C.2.7.b Optical fiber
  - C.2.7.c Sensor networks
  - C.2.7.d Telephony
  - C.2.7.e Wireless
- C.2.8 Mobile Computing
  - C.2.8.a Algorithm/protocol design and analysis
  - C.2.8.b Architectures
  - C.2.8.c Mobile communication systems

- C.2.8.d Mobile environments
- C.2.8.e Support services
- C.2.m Miscellaneous
- C.3 Special-Purpose and Application-Based Systems
  - C.3.a Application studies resulting in better multiple-processor systems
  - C.3.b Microprocessor/microcomputer applications
  - C.3.c Process control systems
  - C.3.d Real-time and embedded systems
  - C.3.e Reconfigurable hardware
  - C.3.f Signal processing systems
  - C.3.g Smartcards
  - C.3.h Ubiquitous computing
- C.4 Performance of Systems
  - C.4.a Design studies
  - C.4.b Fault tolerance
  - C.4.c Measurement techniques
  - C.4.d Modeling techniques
  - C.4.e Performance attributes
  - C.4.f Reliability, availability, and serviceability
  - C.4.g Measurement, evaluation, modeling, simulation of multiple-processor systems
- C.5 Computer System Implementation
  - C.5.0 General
    - C.5.1 Large and Medium (“Mainframe”) Computers
      - C.5.1.a Super (very large) computers
      - C.5.2 Minicomputers
      - C.5.3 Microcomputers
        - C.5.3.a Microprocessors
        - C.5.3.b Personal computers
        - C.5.3.c Portable devices
        - C.5.3.d Workstations
      - C.5.4 VLSI Systems
        - C.5.4.a Impact of VLSI on system design
      - C.5.5 Servers
        - C.5.5.a Web server
        - C.5.5.b Web browser
      - C.5.6 Multiprocessor Systems
      - C.5.7 Wearable Computers

C.5.m Miscellaneous

D Software/Software Engineering

D.0 General

D.1 Programming Techniques

D.1.0 General

D.1.1 Applicative (Functional) Programming

D.1.2 Automatic Programming

D.1.3 Concurrent Programming

D.1.4 Sequential Programming

D.1.5 Object-Oriented Programming

D.1.6 Logic Programming

D.1.7 Visual Programming

D.1.8 Distributed programming

D.1.m Miscellaneous

D.2 Software Engineering

D.2.0 General

D.2.0.a Protection mechanisms

D.2.0.b Software psychology

D.2.0.c Software engineering for Internet projects

D.2.0.d Standards

D.2.0.e Surveys of historical development of one particular area

D.2.1 Requirements/Specifications

D.2.1.a Analysis

D.2.1.b Elicitation methods

D.2.1.c Languages

D.2.1.d Management

D.2.1.e Methodologies

D.2.1.f Process

D.2.1.g Specification

D.2.1.h Tools

D.2.1.i Validation

D.2.2 Design Tools and Techniques

D.2.2.a CASE

D.2.2.b Decision tables

D.2.2.c Distributed/Internet based software engineering tools and techniques

D.2.2.d Modules and interfaces

D.2.2.e Programmer workbench

D.2.3 Coding Tools and Techniques

D.2.3.a Object-oriented programming

- D.2.3.b Pretty printers
- D.2.3.c Program editors
- D.2.3.d Reentrant code
- D.2.3.e Standards
- D.2.3.f Structured programming
- D.2.3.g Top-down programming
- D.2.4 Software/Program Verification
- D.2.4.a Assertion checkers, assertion languages, performance
- D.2.4.b Class invariants
- D.2.4.c Correctness proofs
- D.2.4.d Formal methods
- D.2.4.e Model checking
- D.2.4.f Programming by contract
- D.2.4.g Reliability
- D.2.4.h Statistical methods
- D.2.4.i Validation
- D.2.5 Testing and Debugging
- D.2.5.a Code inspections and walkthroughs
- D.2.5.b Debugging aids
- D.2.5.c Diagnostics
- D.2.5.d Distributed debugging
- D.2.5.e Dumps
- D.2.5.f Error handling and recovery
- D.2.5.g Monitors
- D.2.5.h Reliability
- D.2.5.i Symbolic execution
- D.2.5.j Test levels
- D.2.5.k Testing strategies
- D.2.5.l Test design
- D.2.5.m Test coverage of code
- D.2.5.n Test coverage of specifications
- D.2.5.o Test execution
- D.2.5.p Test documentation
- D.2.5.q Test management
- D.2.5.r Testing tools
- D.2.5.s Tracing
- D.2.5.t Usability testing
- D.2.6 Programming Environments/Construction Tools
- D.2.6.a Environments for multiple-processor systems

- D.2.6.b Graphical environments
- D.2.6.c Integrated environments
- D.2.6.d Interactive environments
- D.2.6.e Programmer workbench
- D.2.7 Distribution, Maintenance, and Enhancement
  - D.2.7.a Conversion from sequential to parallel forms
  - D.2.7.b Corrections
  - D.2.7.c Documentation
  - D.2.7.d Enhancement
  - D.2.7.e Evolving Internet applications
  - D.2.7.f Extensibility
  - D.2.7.g Maintainability
  - D.2.7.h Maintenance management
  - D.2.7.i Maintenance measurement
  - D.2.7.j Maintenance planning
  - D.2.7.k Maintenance process
  - D.2.7.l Portability
  - D.2.7.m Restructuring, reverse engineering, and reengineering
  - D.2.7.n Version control
- D.2.8 Metrics/Measurement
  - D.2.8.a Complexity measures
  - D.2.8.b Performance measures
  - D.2.8.c Process metrics
  - D.2.8.d Product metrics
  - D.2.8.e Software science
- D.2.9 Management
  - D.2.9.a Copyrights
  - D.2.9.b Cost estimation
  - D.2.9.c Enactment
  - D.2.9.d Initiation and scope definition
  - D.2.9.e Organizational management and coordination
  - D.2.9.f Planning
  - D.2.9.g Postclosure activities
  - D.2.9.h Productivity
  - D.2.9.i Programming teams
  - D.2.9.j Project close out
  - D.2.9.k Project control & modeling
  - D.2.9.l Review and evaluation

- D.2.9.m Risk management
- D.2.9.n Schedule and organizational issues
- D.2.9.o Software acquisition
- D.2.9.p Time estimation
- D.2.10 Design
  - D.2.10.a Design concepts
  - D.2.10.b Design notations and documentation
  - D.2.10.c Representation
  - D.2.10.d State diagrams
  - D.2.10.e Evolutionary prototyping
  - D.2.10.f Methodologies
  - D.2.10.g Object-oriented design methods
  - D.2.10.h Quality analysis and evaluation
  - D.2.10.i Rapid prototyping
  - D.2.10.j Representation
- D.2.11 Software Architectures
  - D.2.11.a Data abstraction
  - D.2.11.b Domain-specific architectures
  - D.2.11.c Information hiding
  - D.2.11.d Languages
  - D.2.11.e Patterns
- D.2.12 Interoperability
  - D.2.12.a Data mapping
  - D.2.12.b Distributed objects
  - D.2.12.c Interface definition languages
- D.2.13 Reusable Software
  - D.2.13.a Domain engineering
  - D.2.13.b Reusable libraries
  - D.2.13.c Reuse models
- D.2.14 Human Factors in Software Design
  - D.2.14.a User interfaces
- D.2.15 Software and System Safety
- D.2.16 Configuration Management
  - D.2.16.a Configuration auditing
  - D.2.16.b Configuration control
  - D.2.16.c Configuration identification
  - D.2.16.d Configuration management process
  - D.2.16.e Configuration status accounting
  - D.2.16.f Software release management and delivery
- D.2.17 Software Construction
  - D.2.17.a Construction planning

- D.2.17.b Code design
- D.2.17.c Code tuning
- D.2.17.d Data design and management
- D.2.17.e Error processing
- D.2.17.f Source code organization
- D.2.17.g Code documentation
- D.2.17.h Construction QA
- D.2.17.i Programming paradigms
- D.2.17.j System integration and implementation
- D.2.18 Software Engineering Process
  - D.2.18.a Life cycle
  - D.2.18.b Process infrastructure
  - D.2.18.c Process measurement
  - D.2.18.d Process definition
  - D.2.18.e Software process models
  - D.2.18.f Qualitative process analysis
  - D.2.18.g Process implementation and change
- D.2.19 Software Quality/SQA
  - D.2.19.a Quality concepts
  - D.2.19.b Planning for SQA and V&V
  - D.2.19.c Methods for SQA and V&V
  - D.2.19.d Measurement applied to SQA and V&V
  - D.2.m Miscellaneous
    - D.2m.a Software libraries
    - D.2m.b System issues
- D.3 Programming Languages
  - D.3.0 General
  - D.3.0.a Standards
  - D.3.1 Formal Definitions and Theory
    - D.3.1.a Semantics
    - D.3.1.b Syntax
  - D.3.2 Language Classifications
    - D.3.2.a Applicative (functional) languages
    - D.3.2.b Componentware
    - D.3.2.c Compression technologies
    - D.3.2.d Concurrent, distributed, and parallel languages
    - D.3.2.e Constraint and logic languages
    - D.3.2.f Dataflow languages
    - D.3.2.g Design languages
    - D.3.2.h Development tools

- D.3.2.i Extensible languages
- D.3.2.j Java
- D.3.2.k Macro and assembly languages
- D.3.2.l Microprogramming languages
- D.3.2.m Multiparadigm languages
- D.3.2.n Nondeterministic languages
- D.3.2.o Nonprocedural languages
- D.3.2.p Object-oriented languages
- D.3.2.q Query languages
- D.3.2.r Scripting languages
- D.3.2.s Specialized application languages
- D.3.2.t Very high-level languages
- D.3.3 Language Constructs and Features
  - D.3.3.a Abstract data types
  - D.3.3.b Classes and objects
  - D.3.3.c Concurrent programming structures
  - D.3.3.d Constraints
  - D.3.3.e Control structures
  - D.3.3.f Coroutines
  - D.3.3.g Data types and structures
  - D.3.3.h Distributed objects, components, containers
  - D.3.3.i Dynamic storage management
  - D.3.3.j Frameworks
  - D.3.3.k Inheritance
  - D.3.3.l Input/output
  - D.3.3.m Modules, packages
  - D.3.3.n Patterns
  - D.3.3.o Polymorphism
  - D.3.3.p Procedures, functions, and subroutines
  - D.3.3.q Recursion
- D.3.4 Processors
  - D.3.4.a Code generation
  - D.3.4.b Compilers
  - D.3.4.c Debuggers
  - D.3.4.d Incremental compilers
  - D.3.4.e Interpreters
  - D.3.4.f Memory management
  - D.3.4.g Optimization
  - D.3.4.h Parsing
  - D.3.4.i Preprocessors
  - D.3.4.j Retargetable compilers

D.3.4.k Runtime environments

D.3.4.l Translator writing systems and compiler generators

D.3.m Miscellaneous

D.4 Operating Systems

D.4.0 General

D.4.1 Process Management

D.4.1.a Concurrency

D.4.1.b Deadlocks

D.4.1.c

Multiprocessing/multiprogramming/multitasking

D.4.1.d Mutual exclusion

D.4.1.e Scheduling

D.4.1.f Synchronization

D.4.1.g Threads

D.4.2 Storage Management

D.4.2.a Allocation/deallocation strategies

D.4.2.b Distributed memories

D.4.2.c Garbage collection

D.4.2.d Main memory

D.4.2.e Secondary storage

D.4.2.f Segmentation

D.4.2.g Storage hierarchies

D.4.2.h Swapping

D.4.2.i Virtual memory

D.4.3 File Systems Management

D.4.3.a Access methods

D.4.3.b Directory structures

D.4.3.c Distributed file systems

D.4.3.d File organization

D.4.3.e Maintenance

D.4.4 Communications Management

D.4.4.a Buffering

D.4.4.b Input/output

D.4.4.c Message sending

D.4.4.d Network communication

D.4.4.e Terminal management

D.4.5 Reliability

D.4.5.a Backup procedures

D.4.5.b Checkpoint/restart

D.4.5.c Disconnected operation

D.4.5.d Fault-tolerance

- D.4.5.e High availability
- D.4.5.f Verification
- D.4.6 Security and Privacy Protection
  - D.4.6.a Access controls
  - D.4.6.b Authentication
  - D.4.6.c Cryptographic controls

## F.3 Logics and Meanings of Programs

### F.3.0 General

#### F.3.1 Specifying and Verifying and Reasoning about Programs

F.3.1.a Assertions

F.3.1.b Invariants

F.3.1.c Logics of programs

F.3.1.d Mechanical verification

F.3.1.e Pre- and post-conditions

F.3.1.f Specification techniques

#### F.3.2 Semantics of Programming Languages

F.3.2.a Algebraic approaches to semantics

F.3.2.b Denotational semantics

F.3.2.c Operational semantics

F.3.2.d Partial evaluation

F.3.2.e Process models

F.3.2.f Program analysis

#### F.3.3 Studies of Program Constructs

F.3.3.a Control primitives

F.3.3.b Functional constructs

F.3.3.c Object-oriented constructs

F.3.3.d Program and recursion schemes

F.3.3.e Type structure

F.3.m Miscellaneous

## F.4 Mathematical logic and Formal Languages

### F.4.0 General

#### F.4.1 Mathematical Logic

F.4.1.a Computability theory

F.4.1.b Computational logic

F.4.1.c Lambda calculus and related systems

F.4.1.d Logic and constraint programming

F.4.1.e Mechanical theorem proving

F.4.1.f Modal logic

F.4.1.g Model theory

F.4.1.h Proof theory

F.4.1.i Recursive function theory

F.4.1.j Set theory

F.4.1.k Temporal logic

#### F.4.2 Grammars and Other Rewriting Systems

F.4.2.a Decision problems

F.4.2.b Grammar types

F.4.2.c Parallel rewriting systems

F.4.2.d Parsing

F.4.2.e Thue systems

F.4.3 Formal Languages

F.4.3.a Algebraic language theory

F.4.3.b Classes defined by grammars or automata

F.4.3.c Classes defined by resource-bounded automata

F.4.3.d Decision problems

F.4.3.e Operations on languages

F.4.m Miscellaneous

M.10.1.d Business Case Analysis

M.10.1.e Portfolio Analysis

M.10.1.f Transition Planning

M.10.1.g Project Management and Collaboration

M.10.1.h IT Service Management

M.11 Services Delivery Platform and Methodology

M.11.0 General

M.11.0.a Services Delivery Mechanisms

M.11.0.b Services Engineering

M.11.1 Service-Oriented Services Delivery Platform

M.11.1.a Services Delivery Platform

M.11.1.b Collaborative Services Delivery Platform

M.11.1.c Common Services

M.11.2 Services Delivery Methodology

M.11.2.a Services Delivery Readiness Phase

M.11.2.b Services Delivery Creation Phase

M.11.2.c Services Delivery Operation

M.11.3 Software as Services

M.11.3.a Web 2.0 and Web X.o

M.11.3.b Service Mash-up

M.11.3.c New Business Models

M.11.4 Services as Software

M.11.4.a Asset-based Services Model

M.11.4.b Services Software

M.12 Application Services and Standards

M.12.0 General

M.12.0.a Case Studies in Industry

M.12.0.b Case Studies in Scientific Applications

M.12.0.c Case Studies in Government

M.12.1 Solution-Level Quality of Service

M.12.1.a Context-Aware QoS Model

M.12.1.b Representation of QoS Model

M.12.1.c QoS Data Management

M.12.1.d Business Relationship Model

M.12.1.e Solution-Level QoS Framework

M.12.2 Data Architecture Framework

M.12.2.a Constructs in Data Architecture

M.12.2.b Relationships Between Constructs

M.12.3 QoS Management Modeling

M.12.3.a Modeling of Resources

M.12.3.b Modeling the QoS Assurance Process

M.12.4 Web Services Standard Stack

M.12.4.a Transport

M.12.4.b Messaging

M.12.4.c Description/Publishing/Discovery

M.12.4.d Quality of Service  
M.12.4.e Service Composition  
M.12.5 Industry-Specific Standards  
M.12.5.a Service-Oriented Solution Reference Architecture  
M.12.5.b New Standards  
M.12.5.c Case Studies

O Affective Computing  
O.0 General  
O.1 Affect sensing and analysis

- O.1.1 Nonverbal signals
  - O.1.1.a Facial expression
  - O.1.1.b Gesture
  - O.1.1.c Posture
- O.1.2 Natural language
  - O.1.2.a Sentiment analysis
  - O.1.2.b Speech analysis
  - O.1.2.c Paralanguage analysis
- O.1.3 Physiological Measures
  - O.1.3.a Central measures
  - O.1.3.b Peripheral measures
- O.1.4 Multi-modal recognition
- O.1.5 Recognition of group emotion
- O.2 Modeling human emotion
  - O.2.1 Cognitive models
    - O.2.1.a Appraisal processes
    - O.2.1.b Mood or core affect
    - O.2.1.c Consequences for decision-making
    - O.2.1.d Regulation and coping
    - O.2.1.e Consequences for learning
    - O.2.1.f Affective priming
  - O.2.2 Neural models
  - O.2.3 Perceptual models
    - O.2.3.a perceptual biases
    - O.2.3.b Emotion contagion
  - O.2.4 Action selection
  - O.2.5 Emotion theory
  - O.2.6 Individual and cultural differences
  - O.2.7 Diagnosis or assessment
  - O.2.8 Evaluation studies
- O.3 Synthesis of affective behavior
  - O.3.1 Standards and markup languages
  - O.3.2 Nonverbal synthesis
    - O.3.2.a Facial expression
    - O.3.2.b Gesture
    - O.3.2.c Posture
    - O.3.2.d Physiological signals
  - O.3.3 Language synthesis
    - O.3.3.a Emotional text generation
    - O.3.3.b Emotional speech synthesis
    - O.3.3.c Paralanguage synthesis
  - O.3.4 Multimodal synthesis
- O.4 Affective issues in user interaction
  - O.4.1 Emotion in human-computer interaction
  - O.4.2 Emotion in human-robotic interaction
  - O.4.3 Social effects of synthetic emotion
  - O.4.4 Adaptation to user state
  - O.4.5 Influencing human emotional state
  - O.4.6 Emotional rapport, empathy and resonance
- O.5 Affective issues in enhancing machine/robotic intelligence
  - O.5.1 Comparison to rational methods
  - O.5.2 Function in intelligent systems

- O.5.3 Function in multi-agent systems
- O.5.4 Function in robotic systems
- O.6 Emotional corpora
  - O.6.1 Methods of data collection
  - O.6.2 Methods for emotion elicitation
  - O.6.3 Tools and methods of annotation
- O.7 Technology & devices for affective computing
- O.8 Affective computing applications
  - O.8.1 Education
  - O.8.2 Health care
  - O.8.3 Entertainment
  - O.8.4 Interactive narrative
  - O.8.5 Customer service
  - O.8.6 Design
  - O.8.7 Vehicle operation
  - O.8.8 Social agents/robotics
  - O.8.9 Affective ambient intelligence
  - O.8.10 Customer experience measurement
  - O.8.11 Multimedia retrieval
  - O.8.12 Surveillance systems
  - O.8.13 Biometrics
  - O.8.14 Music retrieval and generation
  - O.8.15 Social science methods or tools
- O.9 Ethical/Societal Implications
  - O.9.1 Engineering ethics
  - O.9.2 Health implications
  - O.9.3 Moral implications
  - O.9.4 Legal implications
  - O.9.5 Public policy
